

We are excited to help you meet your Training Goals. Whether you're new to the cloud Delta Lake or building on an existing skill set, we will help you to find a curriculum tailored to your role or interest. As a Databricks Customer or Partner you are eligible to enroll in our Self Paced Training at no cost to you.

**Select from two options:**

1. Enroll in the **Self-Paced Learning Pathway(s)** that best suit your role [here](#).
2. For those looking to take specific courses, **enroll in all of the Self Paced Courses** that we offer [here](#).
  - If you have an existing Databricks Academy account, log into your account to check out.
  - If you don't have an existing account, you must create one before checking out; the steps for this can be found [here](#).
  - You are allowed to enroll in multiple pathways but for the discount to apply, you must **add 1 item at a time to cart** and then check out.
  - **FREE ACCESS:** your Databricks Academy account (whether an existing account or a new one) **must** be set-up using your corporate email address (currently listed as either @defra.gov.uk, @jncc.gov.uk, or @naturalengland.org.uk) in order to get free access to our Self-Paced Learning Paths or Courses.
  - You will receive an order confirmation via email and within your Databricks Academy account after registering.

**To access your training courses after registering:**

- Log in via [Databricks Academy Account Log In](#).  
Once logged in, go to "My Account" in the upper right-hand corner and then "My Learning".
- Locate the learning path from within your "My Learning" dashboard. Open the learning path, and you'll be presented with a number of self-paced courses.  
Some courses contain materials (Databricks notebooks) to be used in your Databricks workspace. Other courses are video-based.
- Carefully read and follow the instructions for each course to complete your training and refer to this Training FAQ <https://academy.databricks.com/training-faq> for answers to many questions.
- Upon completion of any course that uses notebooks, you must return to Databricks Academy to mark the course complete. Once you do so, you will be issued with a Proof of Completion certification that is found within your Databricks Academy account (see "Awards" tab).
  - With video-based courses, course completion and the issuance of your Proof of Completion are automatic.
- For customer support on training, please submit a [support ticket here](#).
